

Quick Guide for New Meters

1. Service Investigation Fee - \$65 (**Non-refundable**) - This engineering hydraulic study determines the work that needs to be completed for service to be approved.
2. New members may be added for a minimum \$4,400.00 fee.
Note: Other fees may apply. See Tariff Section G.
 - a. \$400.00 Membership Fee (Refundable)
 - b. \$4,000.00 System Buy-In Fee (**Non-refundable**)
 - c. \$_____ Standard Installation Fee - determined when request for service is made (usually \$500.00) (**Non-refundable**)
 - d. \$_____ Customer Service Investigation
3. Before water service can be provided, the following must be completed and in our files.
 - a. Hydraulic Study – (See Service Investigation Fee above)
 - b. Service Application & Agreement
 - c. Copy of the courthouse recorded Warranty Deed
 - d. Easement
 - e. All fees
 - f. Customer Service Investigation Report
4. A. New meters, pressure regulators and cut-off valves are placed on the member's property 2-5 feet from existing water service lines. All installations will be performed under the supervision of the MVWSC operator and their contractor. The pressure regulator and cut-off are installed as a one-time courtesy. Any equipment on the property owner's side of the meter becomes the property and responsibility of the property owner.
B. If a water service line must be extended to the member's property, the cost of the line extension is paid for by the member.
C. The member is responsible for installing the line from the meter to their home with a shut off valve within 2 feet of the meter.
5. We all have fencing and construction projects going on from time to time. We are asking you to call us before you start any construction near a water line. We will come out and mark the line. The cost will be assessed against anyone who damages a water line, unless we have marked the course of the line on the ground before construction begins.

Return Mail to:

Mustang Valley WSC, P.O. Box 6, Cranfills Gap, TX 76637
